## Summary

Final-year B.E. Information Technology student at Pune Institute of Computer Technology with an 8.87 CGPA and strong foundations in C++, Python, Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, DBMS, and Computer Networks. Experienced in developing backend services, REST APIs, multithreaded software, and data-processing pipelines using Python and C++, with hands-on experience in PostgreSQL, Linux, Docker, Git, CI/CD, and software testing. Strong problem-solving and debugging skills with experience in system design, database-driven applications, Agile development, and collaborative software engineering. Additional experience in Generative AI, RAG, LLM integration, and AI-driven automation.

## Education

### Pune Institute of Computer Technology (PICT)

*B.E. Information Technology*  
Bharat Bharti College

*HSC*  
Oasis's English School  
*SSC*

Pune, Maharashtra  
2023–2027 — CGPA: 8.87  
Parbhani, Maharashtra  
2023 — 81%  
Parbhani, Maharashtra  
2021 — 100%

## Projects

### TaskForge — Multithreaded Job Scheduler

**Tech Stack:** C++, STL, CMake

- Built a multithreaded C++ job scheduling engine with worker pools, priority-based execution, dependency-aware scheduling, and thread-safe task processing.
- Implemented dependency graphs, cycle detection, failure retries, and pluggable scheduling strategies using object-oriented design and STL data structures.
- Applied mutexes, condition variables, and synchronization primitives to ensure safe concurrent task execution.

### JanNivaran — Civic Issue Reporting & Resolution Platform

**Tech Stack:** React, Node.js, Express.js, MongoDB, REST APIs, JWT, Google Gemini, Google Maps, Cloudinary

- Developed a full-stack civic issue reporting platform with **RESTful APIs** for geotagged complaint submission, status tracking, resolution proof, and feedback workflows.
- Designed a **layered backend architecture** using Node.js and Express.js with routes, middleware, controllers, services, and MongoDB models.
- Implemented **JWT authentication and role-based authorization** for citizen, department-admin, and superadmin workflows.
- Integrated **Google Gemini for AI-based priority classification**, Google Maps for geolocation/reverse geocoding, and Cloudinary for image and voice evidence management.

## Technical Skills

**Programming Languages:** C++, Python, SQL, JavaScript

**Core CS:** Object-Oriented Programming, Data Structures & Algorithms, STL, Design Patterns, Operating Systems, DBMS, Computer Networks, Software Engineering

**Backend & Development:** REST APIs, FastAPI, Backend Development, Web Services

**Databases:** PostgreSQL, MySQL, MongoDB

**Systems & DevOps:** Linux, Git, GitHub, CMake, Docker, GitHub Actions, CI/CD, Build Automation

**Testing & Quality:** Unit Testing, Integration Testing, Test Automation, Test Case Design, Debugging

**Networking:** TCP/IP, Ethernet, HTTP, Network Management Fundamentals, Routing Fundamentals

**Data Engineering:** Apache Spark, Apache Airflow, Pandas, NumPy

**AI / Generative AI:** Generative AI, RAG, LangChain, LangGraph, Prompt Engineering, LLM Integration, Scikit-learn

**Cloud:** AWS (EC2, S3, IAM), Vercel, Render

## Coding Profiles

Solved 250+ problems across Data Structures & Algorithms, SQL, and algorithmic problem solving; practiced DSA and competitive programming with focus on optimization, edge cases, debugging, and time/space complexity.

## Leadership & Achievements

### Mastercard Code for Change 2.0

2025

*Hackathon Finalist*

- Collaborated in a cross-functional team to design and develop an **AI-powered solution**, contributing to solution architecture, backend development, technical presentations, and iterative Agile development.

### Odoo x SNS Coimbatore Hackathon

2026

*Hackathon Finalist*

- Designed and implemented a scalable technology solution through collaborative software development and product ideation, demonstrating structured problem solving, rapid prototyping, and technical communication.
