Summary

Final-year B.E. Information Technology student at Pune Institute of Computer Technology with an 8.87 CGPA and strong foundations in C++, Python, SQL, Object-Oriented Programming, Data Structures Algorithms, DBMS, Operating Systems, and Computer Networks. Hands-on experience developing full-stack and AI-powered applications using React, Node.js, Express.js, FastAPI, MongoDB, REST APIs, and RAG-based systems. Solved 250+ problems across DSA and SQL, with strong problem-solving, debugging, and software development skills. Experienced in collaborative development through hackathons and project-based work.

Education

Pune Institute of Computer Technology (PICT) — **Pune, Maharashtra**
B.E. Information Technology — *2023–2027 — CGPA: 8.87*

Bharat Bharti College — **Parbhani, Maharashtra**
HSC — *2023 — 81%*

Oasis's English School — **Parbhani, Maharashtra**
SSC — *2021 — 100%*

Projects

GitTalk – AI-Powered GitHub Repository Querying Platform

Tech Stack: *FastAPI, Python, Google Gemini, MongoDB Atlas, LangChain*
- Developed an AI-powered platform that allows users to query GitHub repositories using natural-language questions and receive repository-specific responses.
- Built a RAG-based pipeline using FastAPI, LangChain, Google Gemini, and MongoDB Atlas to retrieve relevant code context and generate responses.

JanNivaran – Civic Issue Reporting System

Tech Stack: *React, Node.js, Express.js, MongoDB, REST APIs, JWT, Google Maps API, Cloudinary*
- Developed a full-stack civic issue reporting platform with role-based access for Citizens, Admins, and SuperAdmins, enabling complaint submission, tracking, and resolution.
- Implemented REST APIs, JWT-based authentication, and proof-based resolution tracking with image evidence to improve transparency and accountability.

Technical Skills

Programming Languages: C++, Python, SQL, JavaScript
Core CS: Object-Oriented Programming, Data Structures & Algorithms, STL, Design Patterns, Operating Systems, DBMS, Computer Networks, Software Engineering
Databases: PostgreSQL, MySQL, MongoDB
Systems & DevOps: Linux, Git, GitHub
AI / Generative AI: Generative AI, RAG

Coding Profiles

Solved 250+ problems across Data Structures & Algorithms, SQL, and algorithmic problem solving; practiced DSA and competitive programming with focus on optimization, edge cases, debugging, and time/space complexity.

Leadership & Achievements

Mastercard Code for Change 2.0 — **2025**
Hackathon Finalist
- Collaborated in a cross-functional team to design and develop an **AI-powered solution**, contributing to solution architecture, backend development, technical presentations, and iterative Agile development.

Odoo x SNS Coimbatore Hackathon — **2026**
Hackathon Finalist
- Designed and implemented a scalable technology solution through collaborative software development and product ideation, demonstrating structured problem solving, rapid prototyping, and technical communication.

Extracurricular Activities

Performing Arts & Visual Art: Practiced classical dance and singing, and developed skills in realistic sketching, demonstrating creativity, discipline, and attention to detail.
Creative Writing: Created a self-written script used for maintaining a personal diary, reflecting creativity and written communication.

Hackathons: Participated in **Mastercard Code for Change 2.0 (2025)** and **Odoo x SNS Coimbatore Hackathon (2026)**, contributing to collaborative problem-solving and solution development.
PICT Flagship Event: Served as a member of the **Result Evaluation Team**, contributing to event evaluation and coordination.
